

FONTAINE LST

Lock Sensing Technology

An additional check to help protect your equipment and cargo

Dashboard Visual Indicator

Wedge Sensor

Kingpin Sensor

Control Module

Fontaine LST is a performance option to enhance 7000 and C7000 Series top plates

- Rugged design features high end components for greater reliability and durability
- Components are recessed in the steel reinforced housing for added protection
- Two electronic sensors communicate with the in-cab indicator to let you know when the kingpin is positioned in the lock
- Provides an additional check to supplement the required driver visual inspection and tug test
- A convenient and economical option that is easy to use
