FONTAINE NO-SLACK®

Put the Fontaine No-Slack® advantage to work for you!

Here's how it works: As the **KINGPIN** moves into the throat of the fifth wheel, the **JAW** slides into place making contact with the kingpin. Then the **WEDGE** presses against the jaw to automatically remove any slack between the kingpin and the jaw. Only available from Fontaine!

What No-Slack® means for you

- Superior fifth wheel technology that self-adjusts for kingpin wear to give you a snug, secure connection every time
- Switch from trailer to trailer hassle-free
- Reduces shock inputs into the frame when braking and accelerating
- Extends the life of components and reduces maintenance costs
- Drivers love the smoother ride and the easy-to-pull handle
- The industry's best defense against false coupling

Select complete assemblies now up to 50% off! Participating Part Number Cross Reference
