# FONTAINE NO-SLACK®

## How No-Slack® Works:

As the **KINGPIN** moves into the throat of the fifth wheel, the **JAW** slides into place making contact with the kingpin. Then the **WEDGE** presses against the jaw to automatically remove any slack between the kingpin and the jaw. This design is only available from Fontaine. See it for yourself here: [www.fifthwheel.com/no-slack](http://www.fifthwheel.com/no-slack)

Kingpin

Jaw

Wedge

## What No-Slack® means for you:

- Superior fifth wheel technology that self-adjusts for kingpin wear to give you a snug, secure connection
- Switch from trailer to trailer hassle-free
- Reduces shock inputs into the frame when braking and accelerating
- Drivers love the smoother ride and the easy-to-pull handle
- Extends the life of components and reduces maintenance costs
- The industries best defence against false coupling
- Only available from Fontaine
